

Harrods Menswear Revamp

International Fashion Destination

We worked closely with the designer at Callison Architects to develop stylish new Lightpanels for the landmark British retailer Harrods.

Polished stainless steel framed Lightpanels of varying sizes were designed and manufactured at our Essex based factory specifically to compliment the lavishly decorated department.

Each panel was designed to accept a Duratran graphic sandwiched between a slim protective Perspex cover and an opal rear. The graphics were then back lit with 5000k LEDs adding depth and life to the images. The LEDs provide a clean even illumination in addition to being energy efficient and generating no heat - **the perfect retail solution!**
