

## Award Winning Lighting

### Chan Restaurant, Greece

The expertise of NES has been highlighted once again through the Chan Restaurant winning the lighting prize at the recent Restaurant & Bar Awards 2011.

NES manufactured the LED lightpanels and the bespoke aluminium wall and ceiling panels. Each of the aluminium panels was anodised black and punched with 6mm holes allowing the specifically designed soft lighting of the LEDs to shine through.

We are unique in our ability to fabricate the metal components of the architectural lighting along with the LED flat panel lighting technology; and this ability has helped create the overall effect required by designer Andy Martin Associates; a testimony to the design and build excellence of NES.
