

# Atlantic Pavilion Liverpool

## Illuminated Reception Features

NES were thrilled to be part of the refurbishment of Atlantic Pavilion; part of the Category 1 listed Albert Docks, the highest profile element of Liverpool's extensive and historic docklands.

Refurbishment of the 2nd floor office and ground floor reception area included NES illuminating the curved reception desk with 6 LED Lightpanels.

Frameless lightboxes were manufactured and installed to the lift shaft wall and the iconic building's interior archways, using NES's specialist aluminium hanging system.

Each Lightpanel uses 24V LEDs connected to a dimmable transformer. The panels were diffused with opal polycarbonate with stylish black returns; with the overall effect complimenting the historic character of the building.
